Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 April 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II in Paper No. 11 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10; and 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,402,564 to Tsukasaki.

Regarding claims 10 and 15, Tsukasaki discloses a plurality of mounting members disposed for mounting the electrical component, each of the mounting members 200 including a respective data storage device 503 wherein each of the data storage devices stores an amount of mounting process data of each of the respective mounting members (see col. 8, lines 34-62); and

control device 500 disposed for controlling the automatic component-mounting unit, each of the data storage devices 503 transmitting the amount of mounting process data is utilized so as to adapt each of the mounting members 200 for optimal use during the mounting of the electrical component.

Regarding claim 12, Tsukasaki teaches the mounting members include a mounting head member 217.

Regarding claim 13, Tsukasaki teaches the mounting members include a mounting feeding member 100.

Regarding claim 14, Tsukasaki teaches the mounting members including sensor member 164 (see col.7, lines 52-67).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tsukasaki in view of US Patent No. 5,588,195 to Asia.

Tsukasaki fails to teach data storage devices which includes a transponder unit for communicating with the control device in a contactless manner, and the transponder is directly attached to the mounting member.

Asai teaches data storage devices which includes a transponder unit 316 for communicating with the control device in a contactless manner, and the transponder is directly attached to the mounting member (see col. 26, lines 8-19) for the purpose of improving durability, which produces longer life expectancy for the system.

It would have been obvious to one of ordinary skill in the art, at the time of the invention, to modify the invention of Tsukasaki et al with transponder unit for communicating with the control device in a contactless manner, in light of the teaching of Asai, in order to improve durability, which produces longer life expectancy for the system.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patent is cited to show the state of the art with respect to automatic mounting components.

US Patent No. 6,230,393 to Hirano.

Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, should be directed to the group clerical personnel. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information. M.P.E.P. 203.08.
